1 aztex tutorial

1.1 Lists

This is an ordered list:

1. write tokenizer

2. write parser

3. write internal representation

4. **???** asdf

5. profit

You can also use an *unordered list*:

- milk

- ~~one~~ <u>three</u> eggs

- *bread*

- potatos

1.2 Text

~~If~~ **when** you make mistakes you can ~~strike through~~ text. You can event link to your favorite sites, like aztex. Don't forget to "quote your sources" too.

1.3 Tables

id	name	email
1	bob	bob@mail.com
2	tom	tom@mail.com
3	ron	ron@mail.com
id	name	email
1	bob	bob@mail.com
2	tom	tom@mail.com
3	ron	ron@mail.com

What happens **now**?

1.4 <u>Altogether</u>

We can ~~mix**~~ ~~it~~ <u>*all*</u> together!
